

Dr. Gaddis-

What a pleasure it was to have you with us at TCC. You were just what the doctor ordered! I didn't realize how much we all needed the time together just to have fun and laugh.

Your presentation was just outstanding. Faculty especially enjoyed the interaction and teaching tips.

After you left today, I heard faculty discussing ways to implement your suggestions i.e. name badges, table tents, greeting the students at the door and many other ideas were generated during the "stop, start, and continue" session. Wow, anyone who can get faculty thinking creatively at one setting is a miracle worker!

You're such a special person. I wish you could have stayed with us longer so we could get better acquainted... I could have used some of your one-on-one coaching tips! Anyway, we all benefited from the time you spent with us today. I'll look forward to seeing you again very soon.

Take care,
Lisa
